REASON FOR TODAY'S CALL:

1. In sink food disposer clogged 2. Toilet sink plug drain system broken

DESCRIPTION OF WORK PERFORMED:

Garburator: I removed a circular piece of metal from the grinding chamber which turned out to be a part of the stove top. Tested by filling and draining the sink while running the garburator. Lavatory Sink: The stopper was missing a piece that attaches it to the mechanical lever arm. I removed the ptrap but this piece was not there. I cannot replace just this piece. The sink is draining well but it does not have use of the mechanical stopper, if use of the stopper is required we will have to replace the drain assembly.
