REASON FOR TODAY'S CALL:

-dishwasher fills with dirty water even when not in use.

## DESCRIPTION OF WORK PERFORMED:

The dishwasher drain hose was not supported under the kitchen sink. I believe water was draining through the garburator down into the dishwasher through this hose. I raised the dishwasher drain hose and supported it as high as it could be supported under the countertop and drained the contents of the dishwasher.

## **TECHNICIAN RECOMMENDATIONS:**

The kitchen faucet is not supported properly to the countertop. I tried to tighten it but it would not budge. This faucet should be replaced.
