**REASON FOR TODAY'S CALL:**

"We recently had another leak from an upstairs unit. Following the restoration we've noticed a new leak from under the bathroom sink which may be a result of the dehumidifier seals are failing."

**DESCRIPTION OF WORK PERFORMED:**

Water was leaking through the threads at the bottom of the mechanical drain assembly. I removed the drain assembly and re-installed with putty under the chrome drain and also found that 2 of the ABS fittings were not properly glued, I glued these fittings then tested by filling and draining the sink multiple times.

**TECHNICIAN RECOMMENDATIONS:**

It is important to note that the lavatory sink has a hairline crack underneath.
