**REASON FOR TODAY'S CALL:**

"My kitchen sink is clogged. For background, I've tried to plunge it (made it worse), used liquid drano (nothing), and went in 15 feet with an auger (pulled out some minor things), but it's still not draining. My bathroom pipes drain fine though."

**DESCRIPTION OF WORK PERFORMED:**

I tried to clear the blockage with the PowerSpin drain snake but could not. I ran the snake through the clean-out located under the sink the full 25' three times and did not hit any obstruction. I grabbed the K400 from our storage locker and ran it through the clean-out to clear the blockage, then ran it through another 4 times while running hot water to flush away debris. Tested by filling and draining the sink multiple times.
