**REASON FOR TODAY'S CALL:**

"Tub Faucet and Shower connection loose or broken. When you turn the knob for shower on the water seems to run everywhere including behind the wall and has run on the floor"

**DESCRIPTION OF WORK PERFORMED:**

-I removed the shower trim & handle and found that the diverter spool had fallen right out of place(AJ took photos). I re-secured the diverter spool and tested before re-installing the trim and handle. -While onsite AJ asked me to inspect 4 other units in the same building and all diverters were secure.
