## REASON FOR TODAY'S CALL:

"I just found out that the sink in my kitchen is leaking slightly. The problem is I cannot locate the source of the leak. The underside of my countertop (made of particle board) is soaked, but the pipes to the taps do not appear to be leaking underneath. I need someone to find and stop the leak."

## DESCRIPTION OF WORK PERFORMED:

---APRIL28: The cold shut off valve for the kitchen faucet was not fully shutting the water off. Will have to schedule a water shut down to repair the valve. ---May20th: The buildings plumber repaired the valve and installed a new faucet.
