REASON FOR TODAY'S CALL:
 -replace lavatory faucet. *give 10 minute warning.

DESCRIPTION OF WORK PERFORMED:
 I replaced the lavatory faucet with a new Delta Lahara. Tested by filling and draining the sink multiple times.

TECHNICIAN RECOMMENDATIONS:
 There was some water damage to the rear of the cabinet. It appeared to be coming from a very small drip emanating from a Wirsbo connection just before the cold shut off valve. I used a hair dryer to heat up this fitting and it appears to have stopped the leak. If this fitting does start to drip again the wall will have to be opened to repair. I recommended leaving a small Tupperware container under this fitting and suggested that it be checked for moisture periodically.
