REASON FOR TODAY'S CALL:
Garburator jammed, dishwasher backing up.

DESCRIPTION OF WORK PERFORMED:
 -I unjammed the garburator and tested by filling the sink and draining while running the garburator. I did not notice anything out of the ordinary I the grinding chamber, it just seemed to have a buildup of rust. During testing I noticed water leaking from a loose connection on the drain, I tightened this connection and tested again. -I drained the standing water from the dishwasher by running it through a quick cycle.
