**REASON FOR TODAY'S CALL:**

- Toilets x4: We have four toilets that have varying degrees of flushing / filling up issues. We did have the rubber parts replaced on some of them but that doesn't seem to have lasted long. Would love to have someone come in and take a look. - Bathtub x1: One of the bathtub's plug does not seal all the way so it always takes super long to fill it up and water escapes while taking a bath. It's one of those metal plug that screws in and out (not the rubber kind that you can remove completely).

**DESCRIPTION OF WORK PERFORMED:**

GROUND FLOOR TOILET: I made an adjustment to the flapper and tested. POWDER ROOM TOILET ON 2nd FLOOR: Tested and seems to be in good working order. TOP FLOOR GUEST BATHROOM: I replaced the tub drain trim and tested by filling the tub 6" and draining. I made an adjustment to the toilet flapper. MASTER BATHROOM: I made an adjustment to the flapper.
