REASON FOR TODAY'S CALL:
Garburator jammed

DESCRIPTION OF WORK PERFORMED:
-I managed to free up the grinding chamber but the garburator was not operating as normal. Pieces of the grinding chamber had rusted and flaked off and the spinning wheel at the base of the chamber was warped causing it to rub on the side walls when in use. I replaced the Garburator with new and tested by filling and draining the sink while running the garburator.
