REASON FOR TODAY'S CALL:

When I'm filling up the bath tub with water, it starts to leak onto the floor. It is coming through the caulking and pooling by the toilet on the tiles.

DESCRIPTION OF WORK PERFORMED:

The tub has grade angled toward the outer edge. There was water leaking through the shower valve cartridge, down the tile onto the upper lip of the tub and across to the floor. I replaced the valve cartridge and re-tested. All in good working order with no signs of water leakage.

TECHNICIAN RECOMMENDATIONS:

The tenant mentioned while I was onsite that water was leaking from ceiling above her couch. This should be looked at asap.
