REASON FOR TODAY'S CALL:
 Hardwood floor near kitchen sink is starting to show signs of water damage.

DESCRIPTION OF WORK PERFORMED:
 I inspected under the dishwasher and cabinets using an extendable camera but found no signs of moisture. I ran the dishwasher through a cycle and still saw no moisture. I filled and drained the kitchen sink and saw no signs of leaking. The only moisture I did notice was a small amount of water on the bottom of the cabinet below where the kitchen faucet spray hose hangs down. There was also moisture directly above this wet spot where the faucet attaches to the sink. It appears that water had possibly leaked from the countertop behind the faucet to the underside of the faucet and through the countertop.

TECHNICIAN RECOMMENDATIONS:
 I informed Alissa to keep an eye on the warped section of hardwood and to keep a tupperware container under the sink below the faucet and keep an eye on that to see if any water is noticed.
