## REASON FOR TODAY'S CALL:

Three problems currently. To the best of my knowledge none of these things are related! - chain in toilet tank to flush the toilet has broken - clogged sink drain kitchen tap isn't flowing correctly. The water pressure is low and not consistent.

## DESCRIPTION OF WORK PERFORMED:

---Toilet: I replaced the tilt valve actuator and tested. ---Lavatory Drain: I showed the home owner how to remove the top of the drain and he cleared out some gunk and is now draining fine. ---Kitchen Faucet: I removed the spray head to find that there is full pressure coming out of the spray hose. I suggested calling Kohler customer care as they may send a replacement head out under warranty.
