REASON FOR TODAY'S CALL:

Leaky toilet - looks like the flapper isn't functioning properly and is preventing the tank from filling up. Tenant will be onsite.

DESCRIPTION OF WORK PERFORMED:

-The toilet flapper was warped allowing water to constantly trickle from the tank to the bowl, I replaced this flapper and during testing notice that the fillvalve was struggling to turn the flow of water off once the tank was full. I replaced the fillvalve and supply line, tested again and in good working order.
