REASON FOR TODAY'S CALL:

We have two problems. The first is that our drain is broken and we can not get the stopper to stay open to allow the water to drain. The second problem is that our switch from the shower head to the tub faucet is broken. Neither source is the principle source of water and the water comes from both.

DESCRIPTION OF WORK PERFORMED:

-I replaced the tub drain trim with a new lift & turn style drain. -I tried to remove the shower valve handle & trim but it was seized up and could not be removed. A new trim and handle will have to be ordered from Danze before we can replace the diverter spool.
