REASON FOR TODAY'S CALL:

Pre-emptive care for both a faucet (Moen) and garburator that I want to make sure aren't going to break catastrophically. The faucet is coming loose and feels like it may snap off when turning it off. The garburator has been vibrating noticeably more than in the past when it's turned on.

DESCRIPTION OF WORK PERFORMED:

-The faucet was showing signs of deterioration, I replaced the faucet with a new Delta Palo and tested. -I tested the garburator and it is in good working order.
