**REASON FOR TODAY'S CALL:**

The drain under my bathroom sink is beginning to back up. I think the problem is further down the drain near the wall. It needs to be routed. This problem happened about 13 years ago as well. The drain was routed and has been good until now.

**DESCRIPTION OF WORK PERFORMED:**

I cleaned the lavatory drain using the PowerSpin drain snake and tested by filling and draining the sink multiple times. There was an open portion of drainage under the lavatory sink where the dryer condensation hose drains into. I used a dishwasher drain coupling to secure the condensation hose to the drain.
