REASON FOR TODAY'S CALL:  
kitchen faucet leaking.

DESCRIPTION OF WORK PERFORMED:

-I tested the kitchen faucet by running it for 10-15 minutes moving the handle between hot and cold but could not get it to leak onto the countertop. It is possible that water is being splashed onto the countertop while using the sink. I asked Vera to keep an eye on it and, if it leaks again, to let us know exactly what occurs prior to leaking. -During testing I noticed that the ABS drainage under the sink was cracked and had a small leak. I re-piped the drainage and tested by filling and draining both sides of the sink. -While onsite Vera mentioned that the dishwasher door gasket had fallen out. I pushed it back in place and ran the machine through a short cycle. If it falls out again I suggest calling the appliance repairman who originally installed it.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Re-Pipe ABS Drainage - DOUBLE KITCHEN SINK	\$169.00	\$169.00
