REASON FOR TODAY'S CALL:

1. Kitchen drain is plugged 2. Garburator won't work - probably related to 1. 3. Bathroom sink stopper is missing. Long story, but it's one of those ones that's attached to a knob at the faucet. 4. Different bathroom faucet is dripping.

DESCRIPTION OF WORK PERFORMED:

-I unblocked the kitchen sink drain blockage using the PowerSpin drain snake. The garburator grinding chamber had deteriorated to the point where it could not be salvaged. I removed the garburator, installed a basket strainer in its place, and re-piped the ABS drainage. Tested by filling and draining both sides of the sink. -I suggested buying a rubber stopper for the master bathroom lavatory sink. -I replaced the Hot & Cold cartridges in the guest bathroom lavatory faucet.
