REASON FOR TODAY'S CALL:  
 -leak under the kitchen sink. -drain backing up

DESCRIPTION OF WORK PERFORMED:  
 ---Nov19: The kitchen sink drain was backed up. The right side sink basket strainer was loose allowing water to seep out. I cleaned the kitchen sink drain using our PowerSpin drain snake and tested by filling and draining both sides of the sink multiple times. During testing I noticed a very small leak coming from the bottom of the garburator. Unfortunately when a garburator starts to leak through the unit it cannot be repaired and must be replaced. ---Nov30: I replaced the garburator with a new Badger5 & tested by filling both sides of the sink and draining while running the garburator.
