**REASON FOR TODAY'S CALL:**

I bought a new dishwasher and am not able to connect the water supply. The existing condition (photo attached) has a Dahl mini-ball valve that I partially disconnected when I removed the original hose. The original hose was "hard wired" and I ended up uncoupling the Dahl valve that you can see in the photo after cutting the original dishwasher hose. What I think I need is a new Dahl valve to be installed that is compatible with a standard dishwasher connection, or a better plumbing solution.

**DESCRIPTION OF WORK PERFORMED:**

I installed a new straight stop for the dishwasher.
