REASON FOR TODAY'S CALL:
Leak under kitchen sink

DESCRIPTION OF WORK PERFORMED:
-The garburator was leaking from cracks in the housing. I replaced the garburator and tested by filling and draining the sink. -The tenants mentioned that when they push the kitchen faucet back towards the wall it causes it to leak, when I was testing it it seemed fine then the tenant pushed the handle past the fully open position and it did leak. I told them that there is no need to push the handle back so far. The faucet is functional but it does look to be the original to the building and it would be a good idea to replace it soon.
