REASON FOR TODAY'S CALL:

- The dishwasher doesn't drain the water
- The grinder in the sink is stuck

DESCRIPTION OF WORK PERFORMED:

-The dishwasher would not drain because whoever installed the garburator forgot to remove the drain plug. I removed the drain plug, re-connected the dishwasher drain hose to the garburator, and drained the standing water out of the dishwasher by running it through a drain cycle. -I unjammed the garburator by removing what appeared to be a small stone. Tested by filling and draining both sides of the sink while running the garburator.
