REASON FOR TODAY'S CALL:
 Toilet kept running, lever was all the way up, the only thing that seemed to worked was to lower pressure by starting to shut off water supply to toilet. Now the valve for the water supply to toilet is broken and can not be shut off so need new valve is okay turned on but leaks badly if not fully open and can not be closed .i will be able to shut off water for whole house. May also need to replace internal workings in toilet? Toilet is in spare room so not critical but do have company next weekend

DESCRIPTION OF WORK PERFORMED:
 I repaired the wc shut off valves by replacing the washer, stem, packing, packing nut, and handle. I also replaced the toilet fillvalve, flapper, and supply line.

TECHNICIAN RECOMMENDATIONS:
 I noticed the main water shut off valve has a very slow drip coming out of the stem of the handle. I mentioned this to Jeffrey.
