REASON FOR TODAY'S CALL:

I was a horrible human being and likely put too much fibrous fruit material down my garbage disposal unit. Unit is now leaking in the middle portion and from an area at the back. Sink also isn't draining properly. Existing unit is original to the condo so I've pre-purchased a new unit in case the existing one is ready for the appliance morgue.

DESCRIPTION OF WORK PERFORMED:

The garburator was leaking through cracks in the housing. I installed the new customer supplied garburator and tested by filling and draining the sink while running the garburator.
