REASON FOR TODAY'S CALL:

The garburator in our kitchen sink has stopped working (It's an In-Sink-Erator, Model 444-6). We've tried the reset button, but it didn't do anything. I think it must be clogged with something, because the sink also does not drain properly, and when we run the dishwasher, water backs up into the sink a lot! Hopefully you can help us get our sink draining properly and our garbuator working!

DESCRIPTION OF WORK PERFORMED:

-I unjammed the garburator and tested by filling and draining the sink while running the garburator. Nothing was pulled out of the garburator, whatever caused the blockage was washed away.
