REASON FOR TODAY'S CALL:
 Leak under master bathroom sink; could be the gasket or a leak at the back of the faucet, dripping down the back of the cabinet.

DESCRIPTION OF WORK PERFORMED:
 There was a small leak coming from the connection between the hot braided supply line to the brass coupling that adapts to the 3/8" supply tube. I tightened this connection and tested the sink and faucet by filling and draining the sink multiple times. I didn't see any signs of leaking from anywhere else.
