REASON FOR TODAY'S CALL:  
 -garburator fell off of mounting -low water pressure in kitchen faucet

DESCRIPTION OF WORK PERFORMED:  
 -The garburator came loose from the mount. I re-secured it to the mount and tested. -I was informed while onsite the the kitchen faucet was not well secured to the countertop. I removed the spray hose to better gain access to the securing nuts, tightened the nuts, and re-installed the spray hose. -The issue with low pressure in the kitchen faucet seems to be within the spray head. Unfortunately I do not have the key required to remove the aerator.
