PHONE 604-738-6706		EMAIL norma.lee@telus.net	

REASON FOR TODAY'S CALL:

-Install customer supplied kitchen faucet -leak coming from kitchen sink basket strainer. -leak coming from toilet supply line.

DESCRIPTION OF WORK PERFORMED:

---April19: -The Hot & Cold shut off valves under the kitchen sink are not working. They are allowing water to flow through in the fully OFF position. These valves will have to be repaired before the faucet can be replaced. -The WC shut off valve is not working either. This valve will have to be repaired before the supply line can be replaced. ---April21: -I repaired the Hot & Cold shut off valves under the kitchen sink, and installed the customer supplied kitchen faucet. -I replaced the kitchen sink strainer assembly and tested by filling and draining the sink. -I repaired the toilet shut off valve and replaced the toilet fillvalve and installed the new customer supplied braided supply line.

TECHNICIAN RECOMMENDATIONS:

The ptrap under the kitchen sink was damaged from the friction of a drain snake. I tried to stop the slow drip but could not. I did not have all the ABS fittings required for a re-pipe. I recommended that Norma contact the company that did the drain cleaning to ask if they could repair. If not then we will schedule another appointment.
