REASON FOR TODAY'S CALL:
 Shower diverter is not working - pull down on the spout. Does not divert and does not stay pulled down.

DESCRIPTION OF WORK PERFORMED:
 -I repaired the master bathroom tub spout by adjusting an o-ring that slipped out of place. During testing I notice the shower head was leaking, spraying water up to the ceiling. I replaced the shower head and tested. All in good working order. -I also made a small adjustment to the guest bathroom tub spout diverter as it was leaking a little.
