PHONE 778.227.1540		EMAIL vaiseth@gmail.com	

REASON FOR TODAY'S CALL:

Few issues: 1. Leak below kitchen basin - near the couple of the valves. Also from the faucet. (we think this has affected the hardware near it) 2. Water pressure in the kitchen taps is low. 3. Dishwasher - not sure if there is a leak as we saw water once below it and therefore since then have not used it. Also noticed that the detergent is not fully used up in the cycle & plates not clean.

DESCRIPTION OF WORK PERFORMED:

-I repaired the Hot & Cold shut off valves for the kitchen faucet by replacing the washers, stems, packing, packing nuts, and handles. -The kitchen faucet is leaking and although the leaking is not substantial it should be replaced. -The dishwasher is leaking right out of the bottom and cannot be used. It will have to be replaced. I turned the water supply to the dishwasher off. -I filled and draining both sides of the sink and the garburator and drainage appear to be in good shape.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Repair 1/2" x 3/8" Angle or Straight Stop	\$139.00	\$139.00
