REASON FOR TODAY'S CALL:

My bathroom sink has been constantly plugged every 3 months or so. After which I use the draining liquid, it clears up and then clogs within 3 or so months again to the point that it takes 20 min to drain. The building has identified clog in main pipe, they performed cleaning which resulted in my sink getting plugged again. I suspect now that the main pipe is clear, I'll need help clearing the clog in the part underneath the sink.

DESCRIPTION OF WORK PERFORMED:

I used the PowerSpin drain snake to clean the lavatory drain. The blockage was roughly 3' down the drain and consisted of hair and a bobby-pin. Tested by filling and draining the sink multiple times.
