REASON FOR TODAY'S CALL:

1) Water pressure of kitchen faucet has reduced dramatically over recent weeks. 2) Bathtub on 2nd floor is very slow to drain

DESCRIPTION OF WORK PERFORMED:

-I used the PowerSpin drain snake to clean the bathtub drain. -I removed debris from the head of the kitchen faucet. The debris was coming from the shut off valves under the sink breaking down. I repaired the Hot & Cold shut off valves under the kitchen sink by replacing the washers, stems, packing, packing nuts, and handles. - While under the kitchen sink I noticed the ABS drainage was cracked and seeping water in 2 places. I re-piped the drainage and tested by filling and draining the sink.
