REASON FOR TODAY'S CALL:  
leak under kitchen sink

DESCRIPTION OF WORK PERFORMED:  
The garburator mounting bracket worked its way loose and water was seeping out of the connection between the garburator and the mount that attaches to the sink. I tightened this bracket and tested by filling the sink 6" and draining multiple times while running the garburator

TECHNICIAN RECOMMENDATIONS:  
I recommended searching for a battery powered water sensor alarm to keep in the cabinet.
