REASON FOR TODAY'S CALL:
 Dripping kitchen tap and leak from pipe under kitchen sink

DESCRIPTION OF WORK PERFORMED:
 -I repaired the hot & cold shut off valves under the kitchen sink by replacing the washers, stems, packing, packing nuts, and handles. -I rebuilt the kitchen faucet by replacing the seats, springs, ss ball assembly, ball assembly cap, and spout o-rings. I also installed a new aerator. -The leak under the kitchen sink was coming from a loose drain connection, I tightened this connection and tested by filling and draining both sides of the sink. During testing I noticed the garburator was jammed, I unjammed the garburator and tested by filling and draining the sinks again while running the garburator.
