REASON FOR TODAY'S CALL:

Garburator not working.

DESCRIPTION OF WORK PERFORMED:

-I unjammed the garburator by removing a few cherry stems and a small hard piece of plastic. Tested by filling and draining the sink multiple times while running the garburator. -While onsite the tenant mentioned the water pressure in the kitchen faucet was very low, I was able to clean out the filter in the spray head which brought the pressure back to normal.
