REASON FOR TODAY'S CALL:
 Water keeps on leaking from bath tap even when shut fully off.

DESCRIPTION OF WORK PERFORMED:
 The shower cartridge failed and was not shutting the water off, allowing water to continually flow through the tub spout. I repaired the integral shut off valves by replacing the washers, stems, packing, and packing nuts. I then installed the new shower cartridge and re-installed the trim. The handle could not be re-used because the set screw was seized so installed a new one. Tested and in good working order.
