REASON FOR TODAY'S CALL:
 -garburator not turning on -tub is draining very slow

DESCRIPTION OF WORK PERFORMED:
 -I removed hair from the tub drain and tested by filling the tub 6" and draining. -The garburator was jammed due to rust buildup, I managed to free it up but during testing noticed that it was leaking, there was also 3 spots in the ABS drainage that were leaking. These 3 small leaks have created some staining on the cabinet below. I replaced the garburator and re-piped the ABS drainage. Tested by filling and draining both sides of the sink while running the garburator
