REASON FOR TODAY'S CALL:

I have this faucet which is now making shuddering sounds when the tap is turned on, as if there is air trapped in the pipes, and the stream of water seems weaker than before. The problem was noticed about a month ago but now seems to be worse.

DESCRIPTION OF WORK PERFORMED:

-The existing faucet has an issue with the diverter. This diverter would have to be ordered from the manufacturer, and given the fact that Corliss was not a fan of the faucet she decided to replace it. To mitigate the chances of debris from failing shut off valves clogging up the supply lines of the new faucet I repaired the hot and cold valves under the sink by replacing the washers, stems, packing, and packing nuts. I then installed the customer supplied faucet and tested. -I removed a chopstick from the left sink drain and after reassembling the drainage noticed a leak coming from the lower Ptrap, I replaced this Ptrap and tested by filling and draining both sides of the sink multiple times.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Install Kitchen Faucet - Customer Supplied	\$139.00	\$139.00
2		Repair 1/2" x 3/8" Angle or Straight Stop - ADD-ON	\$25.00	\$50.00
