REASON FOR TODAY'S CALL:  
garburator not working. \*give 10 minutes heads up

DESCRIPTION OF WORK PERFORMED:  
-The managed to free up the garburator and tested by filling and draining the sink multiple times while running the garburator. I did not remove anything out of the ordinary from the grinding chamber, it seemed to have been seized up due to rust. -I showed Mona how the garburator can be free'd up if it happens to seize up again in the future.
