REASON FOR TODAY'S CALL:

-drain pipe under our kitchen sink seems to have a slow leak. -shower drain clogged. -lavatory sink draining slow.

DESCRIPTION OF WORK PERFORMED:

-I used the PowerSpin drain snake to clean hair from the shower drain. -I tried to clear the lavatory sink drain with the PowerSpin drain snake for an hour but it felt as though the snake was being guided up the vent rather than down the drain. -The kitchen sink basket strainer was installed incorrectly and the drainage was poorly measured. I re-installed the basket strainer properly and cut in a new Bow adaptor to align the drainage properly. Tested by filling and draining the sink multiple times.

TECHNICIAN RECOMMENDATIONS:

I suggest contacting the plumbing company that deals with the buildings main mechanical systems to have them take a look at the lavatory sink drain. It is possible that they may have to open the wall in the closet behind the lavatory sink and cut a clean out into the drain.
