REASON FOR TODAY'S CALL:
kitchen faucet cartridge broken.

DESCRIPTION OF WORK PERFORMED:

-The shut off valves under the kitchen faucet were not working, we contacted the building manager to find the location of the unit's main water shut off valve then i repaired the hot & cold valves under the kitchen sink by replacing the washers, stems, packing, packing nuts, and handles. I then removed the cartridge from the kitchen faucet and took it with me to our wholesalers to find a replacement. I returned with the new cartridge but found that the stem that broke away from the cartridge was seized up into the handle and could not be removed. -I ended up having to purchase and install a new faucet. Tested and in good working order.
