REASON FOR TODAY'S CALL:

Main floor toilet may be clogged. Plunger is used but water is not moving, it fills & gradual recedes. It recently would leak a bit, then stop by itself through random times throughout the day or when the upstairs bathroom is flushed. The ring was replaced over a year ago by your associate.

DESCRIPTION OF WORK PERFORMED:

-I ran the 6' toilet auger through the main floor powder room toilet and tested by flushing rolled up balls of toilet paper with no sign of clogging. -Bubbles were starting to form on three of the flushvalve gaskets(main floor powder room and 2 toilets upstairs). I replaced these gaskets and tested.
