REASON FOR TODAY'S CALL:
leak coming from kitchen faucet

DESCRIPTION OF WORK PERFORMED:

-The nut securing the faucet cartridge worked itself loose allowing water to leak out from under the handle and onto the countertop. I removed this nut, lubricated the oring attached to it, and reinstalled. Tested and in good working order. I also removed the dishwasher kick plate and ran it through a few fill & drain cycles and found no signs of moisture under the machine.

TECHNICIAN RECOMMENDATIONS:

*though the leak was coming from the faucet itself and not an issue with installation we are not charging for our time.
