REASON FOR TODAY'S CALL:

1) Shower upstairs has had an issue of what seems to be food coming up the drain (not sure how to explain this one...) Shower hasn't been used in awhile. I will have this all cleaned up / disinfected so you're able to inspect. 2) I'm wanting to install a water filter system in the kitchen sink and possibly shower in main floor bathroom. 3) Need help with fridge water dispenser.

DESCRIPTION OF WORK PERFORMED:

-The shower drain upstairs had backed up with dirty water in the past even though the shower had not been used in some time. This backing up has not occurred since. I believe this would have been caused by a blockage or congestion within the buildings main drainage and if the issue arises again it should promptly be brought to the building managers attention. -Alex decided not to install a water filtration tap at the kitchen sink but rather use the filtered water tap on the fridge. -I showed Alex how to install his new water filter cartridge in the fridge.
