REASON FOR TODAY'S CALL:

Recently installed a new garburator, but the existing plumbing under the sink doesn't match up (length/distance wise) with the discharge tube from the garburator. So I'm guessing it'll likely require alteration to the existing plumbing. Also, may also install a new kitchen faucet.

DESCRIPTION OF WORK PERFORMED:

-I re-piped the ABS drainage under the kitchen sink and installed the new kitchen faucet. Before installing the new faucet I had to repair the Hot & Cold valves by replacing the washers, stems, packing, packing nuts, and handles. Tested by filling and draining both sides of the sink multiple times while running the garburator.
