REASON FOR TODAY'S CALL:

1. The garbage disposal in the kitchen is plugged. We plugged it, but it didn't fix it, and tried Draino. 2. Our upstairs bathroom faucet leaks underneath the sink. It's a new faucet, and it's possible that it was badly installed.

DESCRIPTION OF WORK PERFORMED:

-The kitchen sink drain was blocked just below the Tee connection that joins the kitchen sinks I unit 210 & 213 into the main. There was no accessible cleanout so I cut open the ABS drainage, used the PowerSpin drain snake to clear the blockage, and re-connected the ABS drainage using a Fernco coupling. Tested by filling and draining both sides of the sink multiple times. -The lavatory sink on the second floor had a small leak coming from the packing nut on the Hot shut off valve. I tightened this nut and could not see signs of leaking anywhere else.
