REASON FOR TODAY'S CALL:
 master bathroom shower won't fully shut off.

DESCRIPTION OF WORK PERFORMED:

---Sep16: I removed the shower valve trim and found that the valve used is a high flow valve that requires a special order cartridge. I contacted Kohler and they agreed to send out a replacement under warranty. ---Nov2: I installed the new cartridge(GP1144925). During testing I noticed a small leak from the valve mixing cover. I removed it and couldn't find anything visually wrong with it, re-installed it but the leak persisted. I drove to a local Kohler re-seller and bought a valve kit, removed the cover and installed it. Tested and no leak present. I will contact Kohler and have them send out a new valve cover and return the one I purchased.
