REASON FOR TODAY'S CALL:

When the garburator is off, the drainage is slow as compared to previously. When garburator switched is turned on, there is no sound and there is no change in the drain speed.

DESCRIPTION OF WORK PERFORMED:

-I unjammed the garburator and tested by filling and draining the sink multiple times. I was not able to find anything out of the ordinary inside the garburator, whatever caused the garburator to jam up was pushed through.
