**REASON FOR TODAY'S CALL:**

-One of our Toilets isn't completing its flush cycle properly. After a flush, it just runs/trickles on end. The current solution is to turn the water from the wall off and then on, and it "kicks it into gear" and it finishes the flush properly and goes quiet. Also, I fiddled with it enough that there's now a slow leak from the tank to the floor. -Our landlord would like the following hoses replaced: Toilet to wall (\*2) Washing machine cold and hot Dishwasher(\*if it's connected by soft hose as opposed to copper or plastic pipe)

**DESCRIPTION OF WORK PERFORMED:**

-Master Bathroom: The FillValve was malfunctioning, continually filling even after the tank is full. It was also leaking from the connection to the supply line. I replaced the FillValve and supply line and tested. -The supply hoses for the dishwasher, laundry machine, and guest toilet have all been updated, I'm assuming this was done by the plumbing company that facilitated the re-piping of the water lines the previous week.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace toilet FillValve - standard	\$149.00	\$149.00
			SUBTOTAL:	\$149.00
			GST (5%):	\$7.45
			TOTAL:	\$156.45
